

Our School's Eco Council

"We want everybody to love geography
and care for our world"

Our Eco Council play a pivotal role in promoting geography and a care for the environment across the school. To do this, our council get hands on with improving the environment in and around school in multiple ways. Some of the activities the council engage in are:

- Looking after the playground and ensuring it is a clean and tidy space
 - Litter picking in the local community
 - Delivering assemblies and engage in projects across the school
- Plant trees and plants to brighten up our school and our field, as well as helping to combat climate change
- Come up with new ideas to help improve geography in school and the environment around us
- Meet weekly with Mr Cotton to discuss what we are doing or plans for future projects and share/ discuss ideas
 - Encourage all others to look after the environment
